

ENERGY EXPO AT THE RHODE ISLAND HOME SHOW

For the first time, the RI Home Show will feature an **Energy Expo** that can help you take advantage of cutting edge energy saving solutions and money saving tips while improving the comfort of your home. Event sponsors National Grid (www.nationalgridus.com/ri-ee) and the RI Energy Efficiency and Resource Management Council (www.rieermc.ri.gov) invite you to:

- Learn about energy-saving products and services from over **100 energy exhibitors**
- Enter to win a **\$5,000 Home Energy Makeover**
- Attend an **energy seminar** and get entered TWICE to win a \$5,000 Home Energy Makeover and once to win a high-tech Nest thermostat or a high-efficiency lighting kit
- Check out **free energy demonstrations** on high-tech thermostats, air-tightness testing, and DIY pipe insulation
- Join **U.S. Senator Sheldon Whitehouse** and Rhode Island Energy Commissioner Marion S. Gold as they recognize **RI Energy Leaders** on Saturday, April 5th 10:00-11:00 AM
- Have your picture taken with the **Boston Red Sox World Series Trophies** on Thursday, April 3rd 7:30-9:00 PM
- Bring your kids for FREE! They'll have fun while learning about energy in our **Kids' Energy Corner**.

ENERGY DEMOS

Energy savings in action! Visit the National Grid booth for these on-going demos.

How Air-Tight is Your Home? – Is your money slipping through the cracks? See how your home can be tested for air-tightness and learn how you can avoid excess energy consumption, drafts, and mold due to moisture condensation.

High-Tech Thermostats – Hold the power to control your home's thermostats in your hand! Remote access from anywhere using Wi-Fi gives you 24-hour security of your home anytime, anywhere.

Do-It-Yourself Pipe Insulation – Unless pipes and ducts are insulated, they can waste more heat than they deliver. Watch a helpful DIY demo on how you can insulate your pipes yourself and save money!

ENERGY SEMINARS

All Energy Seminar attendees will receive TWO chances to win a \$5,000 Home Energy Makeover and one chance to win a high-tech Nest thermostat or a high-efficiency lighting kit. All seminars are 20 minutes long. Schedule coming soon!

Free Home Energy Assessment

An efficient home that uses less energy will save you more money. All it takes is a little help to get your home into great shape. And that's where National Grid comes in. Come hear how to "Get House Fit" by scheduling a no-cost Home Energy Assessment. An energy specialist will evaluate your home's energy performance and provide you with a personalized report of recommendations to help you save big on your energy costs. We'll tell you how to sign up, what you can expect at your visit, and how to prepare.

Home Energy Reports

Are you using more energy than you did last year? Are you as energy efficient as your neighbor? Your Home Energy Report from National Grid can tell you that and much more. Come hear about the report that everyone is talking about. This session will walk you through the basics of the report and provide you with tips like how to update your profile to get the most accurate comparison between you and similar neighbors. Plus, learn more about what National Grid is doing in communities all across the State with the Rhode Island Energy Challenge: "Find Your Four" campaign, and even pledge on the spot to find four ways to save in your home!

Renewable Energy

Want to know how to make your home run on renewable energy? A solar-powered home may be a possibility for you! The Renewable Energy Fund program is available to home owners and small businesses for solar PV and solar hot water installations. REF Grants are available to applicants throughout 2014. Come learn about the state and federal incentives available to make renewable energy technology in *your* home a reality.

Alternative Home Heating Options

Most of us use either natural gas or oil to heat our homes. But there are other options! Learn about other ways to heat your home that may save you money and may be more environmentally friendly.

Alternative Fuel Vehicles

In the market for a new car? Interested in electric vehicles and hybrids? Join this seminar to learn more about the latest high-technology cars and alternative fuels. Get some helpful fuel economy tips too!

School Fundraiser Program

Want to raise money for your child's school while providing an opportunity for students to learn about saving energy at home? Attend this session on National Grid's School Fundraiser program. Our School Fundraiser allows 100% of the proceeds collected from the sale of energy saving products such as LEDs and CFLs to go directly to the school. Students participating in the

fundraiser will receive a school seminar designed to get them thinking about how to save energy at home. Now that's homework that can save money!

KIDS' ENERGY CORNER ACTIVITIES

Stop by the Kid's Energy Corner for fun, creative and educational activities good for the whole family! Experience the energy it takes to power incandescent and energy efficient light bulbs. Discover new safety tips while your children enjoy our electric and gas safety coloring books. Put on a hard hat and take a family photo in National Grid's bucket truck display and more!
